

To whom it may concern:

Please reject the National Association of Broadcasters (NAB) petition 04-160. As a consumer of satellite radio, I very much enjoy the ability to get local traffic and weather information immediately. Especially since I purchase this service, I don't believe the NAB should be able to dictate what I hear. We are supposed to be about competition and innovation in the USA ... please don't allow the NAB to stifle that.

Thanks for your consideration.

David Burns
